

Want to study Homeland Security?

Managing Resources and Applications for Homeland Security ASM 59100/CNIT 58100 Tue & Thu 4:30 – 5:45 pm

An interdisciplinary practical approach to Homeland Security:

- ⚙️ Homeland security studies
- ⚙️ Risk assessment and management
- ⚙️ Crisis management and communication
- ⚙️ Decision making and team building

Students will explore the characteristics of security, personal and corporate perspectives on security, asset identification and cost/benefit analysis, risk assessment and management, crisis decision making, emergency management and response infrastructures, crisis communication, business continuity, best practices, collaborative approaches, and team building. Real-world case studies will be examined, including the attacks of September 11, 2001, Hurricanes Katrina and Ike, the I-35W bridge collapse, and others. Presentations by outside experts in the field of Homeland Security will be included.

Prerequisite:

ASM 59100/ CNIT 58100 - Foundations in Homeland Security recommended

Senior or graduate-level standing or consent of instructor.

Taught by an interdisciplinary team of faculty:

- ⚙️ J. E. Dietz, Director of Purdue Homeland Security, former Director of Indiana Department of Homeland Security
- ⚙️ W. E. Field, Ag & Bio Engineering
- ⚙️ P. M. Aaltonen, Public Health Nursing
