“Where are you really from?”

“You people always do well in Math.”

“You speak good English.”

If these statements sound familiar to you, you may have encountered racial microaggressions. Microaggressions can be subtle and invisible, making victims question their feelings and do not know how to respond.

This workshop can help you:

- Identify microaggressions towards Asian and Asian American students
- Learn concrete actions to respond to microaggressions

Snacks will be provided.
