DATE: January 22, 2023

SUBJECT: Posthumous Degree Recommendation for the late Ha Kyun (Jason) Ju, submitted by the School of Construction Management Technology and the Purdue Polytechnic Institute, West Lafayette

At its meeting on January 18, 2024, the Purdue University Graduate Council voted to recommend awarding, posthumously, the Master of Science degree in Construction Management Technology to Ha Kyun (Jason) Ju, who died October 4, 2023. A request was submitted by his academic advisor, Professor Kyubyung Kang.

For the awarding of a posthumous Master of Science degree in Construction Management Technology, Purdue University requires that at least 85 percent of the credit hour requirements have been completed including most of the requirements for the major.

Mr. Ju meets the University's requirements for the conferral of a posthumous Master's degree. During the review of Mr. Ju's records, the following were noted:

- Mr. Ju began his Purdue University graduate program in Fall 2022 and enrolled in the Master of Science in Construction Management Technology program effective with the that session.
- Mr. Ju's plan of study for the Thesis-option Master of Science degree was created, and the plan of study included 27 credits, 21 of which have been completed.
- Mr. Ju had satisfactorily completed 6 credits of CM 69800 master's research, for a total of 27 credits completed toward the MS degree between coursework and research.
- Mr. Ju's plan of study focused on Sustainable Disaster Restoration Strategy Using Computer Vision Technology.
- Mr. Ju's advisory committee certifies that he completed sufficient research that a thesis or one or more articles in lieu of a thesis, can be prepared. Further, the advisory committee approves the research and results, including a thesis or article(s), and recommends granting the degree.

Given that Mr. Ju's coursework for the master's program was fully completed, it is my conclusion that Mr. Ju meets the requirements to receive a posthumous Master of Science degree in the Construction Management Technology program.

Office: 765-494-2600

I concur with the action of the Graduate Council in recommending approval of this request for a Master's degree in Construction Management Technology, to be awarded posthumously to Mr. Ha Kyun (Jason) Ju if the Board of Trustees grants approval.
