

BIG DATA TRAINING FOR CANCER RESEARCH

Summer 2022 Purdue University

Purdue University Center for Cancer Research (PCCR) and Indiana University Melvin and Bren Simon Comprehensive Cancer Center (IUSCCC) are pleased to announce the annual NCI-funded workshop on “Big Data Training for Cancer Research” on **May 13-27, 2022**. This 14-day intensive workshop will help cancer researchers develop skills for managing, visualizing, analyzing, and integrating various types of omics data in cancer studies. The course is open to cancer researchers including oncologists, faculty, postdoctoral researchers, and graduate students. Individuals from underrepresented groups are especially encouraged to apply.

There is no cost for registration and tuition! The workshop is planned to be held virtually, but there is a possibility for participants to attend the workshop on-site at Purdue University, in West Lafayette, IN, depending on the COVID-19 situation. There would be no cost for lodging, and travel scholarships would be available for a limited number of participants. Please watch our website for updates.
