

Thomas serves as Chief Commercial Officer for H2O Systems and its affiliate, Triton Water Midstream. Thomas is a Civil Engineer and MBA, with over 25+ years' infrastructure industry experience in Canada, US & Europe.

Thomas has successfully led several major water & wastewater infrastructure projects, as well as a number of multi-billion-dollar Public Private Partnership (P3) developments. Notably, Thomas has been instrumental in the development of H2O's advanced technologies, including silicon carbide ceramic membranes, membrane distillation, super-hydrophobic membranes, electrocoagulation, and eutectic freeze crystallization. Thomas has pioneered the use of these new technologies for challenging industrial waste-waters, especially for the treatment of oilfield produced water.
