

ENVIRONMENTAL HEALTH AND SAFETY

CONSTRUCTION SAFETY, ABATEMENT AND REMEDIATION

DEMOLITION DANGERS

Staying safe when structures come down

- Building demolition will present numerous potential hazards. As such, the perimeter will be protected by a fence with signage to show new routes of travel. **Please follow the posted information.**
- Heavy construction equipment will enter and exit the site through a designated gate. **Please avoid passing near these areas as workers may have limited view of pedestrian or cycle traffic.**
- In addition to changes to walking patterns, changes to driving patterns may also occur. **Watch for construction workers and equipment in these areas and be prepared to stop and expect potential delays.**
- In general, building demolition will change routine sidewalk and road travel patterns. **Please watch for signage indicating new routes of travel and construction equipment.**
- Do not move, enter or cut-through the demolition site, as the site is for authorized personnel only! **Entry is only allowed by a Purdue project manager and contractors.**
