

ENVIRONMENTAL HEALTH AND SAFETY

FACILITY AND OCCUPATIONAL SAFETY

TRAINING - IMPROVING SAFETY

HSI provides web-based training tailored to specific needs for the university, including required OSHA safety courses.

HSI also offers tracking and reporting for multiple courses on lab safety, employee and building safety.

Many departments across campus have established training programs in HSI to meet their training needs. These trainings may include a Lockout Tagout, Purdue Lab Safety Fundamentals or Purdue Hazard Comprehensive Communication training.

Training Dashboard

An individualized training plan with assigned courses is available on the dashboard. This will include all core and additional classes assigned to a department or area.

Members: Using your HSI ID and password login to HSI. Please do not create a new account in HSI.

- To Launch training- Click the blue **LAUNCH** box to start the class
- Transcript Tab -Shows status of all courses: Completed, in progress or to be completed.

You can self-enroll in over 90 courses in HSI. From your training page, click on 'view catalog' at the bottom of the page. You can then search for the course or select from the list.

Did you know that the EHS Laser and Radiation trainings are also now in HSI? Again, members can self-enroll or be assigned these trainings as members.
