FALL 2024 GRADUATE COURSE

Technology Entrepreneurship & Research Translation

ABE/TLI 62600

LEARN TO

TRANSLATE RESEARCH INTO IMPACT

PREPARE FOR CONTEMPORARY JOBS IN INDUSTRY OR ACADEMIA

Understand how to navigate the intellectual, financial, leadership, and management processes associated with translating research into tangible products that have an impact on society. We will cover topics such as intellectual property, investment, publishing versus patenting, conflicts of interest, personal and professional rewards, and timing.

> In this hands-on course, I acquired the skills to transform research into a tangible product. The guest speakers shared valuable insights on creating a minimum viable product and how to pivot.
>
> Emmanuel Alagbe | PhD Student

> This course gave me the opportunity and resources to create version #1 of my pitch deck. The feedback I received was extremely helpful in transiting my idea from a research problem to a business one.
>
> Pranshul Sardana | PhD Student
