

Hi Student Data Community,

The Summer 2024 Term End freeze and the corresponding retention freeze are ready for reporting! The Data Digest will be published immediately following the publication of the President and Provost's press release. We anticipate this will occur sometime between Monday and Wednesday.

Read below for important data updates.

Best,

Molly

Purdue Indy – Definition Updates in Data Cookbook

The following definitions have been created or updated in Data Cookbook with relevant PIN information.

- [4+1 Bachelor/Master Degree Program, Student](#)
- [Academic Course](#)
- [Academic Program](#)
- [Applicant, Student](#)
- [Athlete, Student](#)
- [Campus](#)
 - Polytechnic Statewide locations have been renamed. See definition for details.
- [Consortium Models](#)
- [Counting Purdue Students](#)
- [Engineering Dual Degree Program](#)
- [Graduation Date, Student](#)
- [Honors College Invitation](#)
- [New Beginner, Undergraduate](#)
- [Purdue University Student in Indianapolis](#)
- [Teach Out, Student](#)
- [Transfer Course Grade](#)

A new [Purdue University in Indianapolis Glossary](#) is under development and will be finalized by close of business on Wednesday, September 11th.

Former IUPUI students who are continuing their studies at Purdue Indy do not have correct classification in the Fall 2024 census freeze. Registrar staff are updating these students' transcripts to ensure we have an accurate representation of their credits earned. Once that work is complete, we will be doing a data fix to update the Fall 2024 census freeze with these students' correct classification. In the meantime, the Data Digest will be overwriting the incorrect classification with a placeholder.

Dashboard Updates

- [Undergraduate CODO Student Enrollment and Movement, New Management Dashboard](#)
 - This dashboard provides insights into the enrollment numbers for CODO students. Users can view enrollment numbers, analyze the movement of CODO students, and track student movement longitudinally.
- [SERU – Student Experience in the Research University, Dashboard](#)
 - Updated with 2024 student data

New and Updated Reports

- [Grade Change Report](#) (update)
 - This report shows any grade changes in a specified time range displaying the changed grade, reason for grade change, grade change date, and the user responsible for the change.
- [Courses Not Recently Taught – Census](#) (new)
 - This report identifies courses not taught since the chosen term AND any time before the chosen term. Courses available in the Catalog that have never been taught will not appear in this report.
- [Section Enrollment Report \(SER\)](#) – Indianapolis (new)
 - This version of the SER was created to fulfill the very specific need of a breakout by type of consortium course.
 - Team content > Standard Content > Courses > Registration > Section Enrollment Report (SER) - Indianapolis
- Minor changes have been made to report availability in our continuing efforts to improve the student reporting environment. You can see those changes in [Data Cookbook](#).

Deduplication Admissions

We will have a version of the report that starts Summer 2024 forward using a different methodology, but historical reporting will remain the same. The App, Admit, Matric Data Digest dashboard will also be updated to have the new methodology. Read more about the methodology change in [Data Cookbook](#).

We understand that the new Summer 2024 – forward report runs slowly, but our priority has been to provide accurate data. We will have a streamlined, singular Cognos report when the new data warehouse is complete. In the meantime, here is the list of Cognos reports that will be available by close of business Wednesday, September 11th, 2024:

- [Admissions Summary Report - Undergraduate - Census \(Fall 2008-Spring 2024\)](#)
- [Admissions Summary Report - Undergraduate - Census \(Summer 2024-present\)](#)
- [Selectivity & Yield - Census \(Fall 2008-Spring 2024\)](#)
- [Selectivity & Yield - Census \(Summer 2024-present\)](#)

Dashboard Updates to be completed by 9/13/2024

- Data Digest
 - Student Enrollment
 - Applications, Admits, & Matriculations
 - New First-Time Beginner Profile
 - Retention and Graduation Rates, Undergraduates
 - Campus filter default – PWL + PIN
 - The Data Digest campus filter default will now include both Purdue West Lafayette and Purdue in Indianapolis. Purdue Indy is an extension of the West Lafayette campus and reporting will represent both locations moving forward.
- Management Dashboards
 - CODO
 - Historical Course
 - Student Performance – now with Honor’s breakout!
