

Immunization Submission Instructions

Step 1: Obtain official immunization record. Records must be in English, legible, and include your name.

Examples: Electronic or hand-written record from your doctor's office or school or a completed immunization history form that has been completed and signed by your doctor's office.

[Immunization History Form](#)

Step 2: Ensure your records include all the required vaccines and meet the dosing schedule requirements for Purdue.

Vaccine	Requirement
Rubeola (Measles, MMR)	2 Doses of live vaccine administered after first birthday and at least 28 days apart.
Rubella (MMR)	2 doses of live vaccine administered after first birthday, and at least 28 days apart.
Mumps (MMR)	2 doses of live vaccine administered after first birthday, and at least 28 days apart.
Tetanus Diphtheria (Td or Tdap)	No more than 10 years before starting classes.
Meningitis (Men Quad/Conjugate, MCV4)	One dose on or after 16th birthday , if 23 years or younger.
Meningococcal B (Separate from Meningitis)	2 doses of the same brand (Bexsero or Trumenba), if 23 or younger.

Step 3: Log in to your [patient portal](#)

Step 4: Click Medical Clearances

Step 5: Upload your immunization records by clicking the update box next to immunization proof

Items required for clearance:

Clearance	Status	Details
Immunization Proof	Update ⊗ Not Compliant	Not Satisfied ⓘ

Step 6: Enter the dates for each of the required vaccines using the update boxes next to the name of each vaccine.

Measles	Update	⊗ Not Compliant	No Data
Meningococcal B	Update	⊗ Not Compliant	No Data
Meningococcal Conjug ACWY	Update	⊗ Not Compliant	No Data
Mumps	Update	⊗ Not Compliant	No Data
Rubella	Update	⊗ Not Compliant	No Data

Enter the date and select the name as it appears on your record. In this example, Measles can be found in the MMR vaccine or Measles alone. The Antibody titer is not required if the student has 2 doses of Measles after their first birthday.

Measles (rubeola)

This requirement can be satisfied by 2 measles-containing vaccines after your first birthday and at least 28 days apart OR a positive Measles Antibody IgG blood test. MMR is the most common vaccine for this.

Doses of Measles or MMR Vaccine

Date 1 MM/DD/YYYY	Vaccine1 Select one...
Date 2 MM/DD/YYYY	<div style="border: 1px solid #0070C0; padding: 2px;"> Select one... Measles (Measles) Measles/Rubella (Measles & Rubella) M-M-R II (Measles-Mumps-Rubella) MMR (MMR) MMRV (MMRV) </div>

Measles Antibody Titer (blood test)
