Purdue's open limited submission competitions, templates, and limited submission policy may be found at <http://www.purdue.edu/research/funding-and-grant-writing/limited-submissions.php>. Please contact Sue Grimes (sgrimes@purdue.edu) with any questions.

The Purdue Office of the Executive Vice President for Research and Sponsored Program Services (SPS) have launched a [website](#) to provide the most up-to-date information to help ensure compliance by researchers who may have grants impacted by executive orders during this period of transition at the U.S. government and among U.S. federal agencies.

Researchers should continue working on their grants and contracts unless you receive instructions from your grant program officer, agency contact or Purdue SPS. Any researcher who has received or receives information from your grant program officer or agency should reach out to SPS at spsopers@groups.purdue.edu to be directed to the appropriate person to help determine actions and next steps. Likewise, if SPS receives communication from an agency, they will notify directly relevant principal investigators if action needs to be taken.

The website has the current status for each agency and will be updated as new information is available.

1. **Limited Submissions:**

Preproposals should be submitted via Purdue's InfoReady portal (<https://purdue.infoready4.com/>). For any case in which the number of preproposals received is no more than the number of proposals allowed by the sponsor, the OOR will notify the PI(s) that an internal competition will be unnecessary. Questions should be addressed to OORlimited@purdue.edu.

Limited Submission: [The Conservation, Food & Health Foundation](#) The Conservation, Food and Health Foundation seeks to protect the environment, improve food production, and promote public health in Africa, Asia, the Caribbean, Latin America, and the Middle East. The Foundation supports projects and applied research that: Generate local or regional solutions to problems affecting the quality of the environment and human life; Advance local leadership and promote professional development in the conservation, agricultural, and health sciences; Develop the capacity of local organizations and coalitions; and Address challenges in the field. The Foundation funds applied research, pilot projects, new initiatives, training, and technical assistance, rather than ongoing support for programs that are already well underway. An important goal for the Foundation is to provide seed money to help promising projects, organizations, and individuals develop the track record they need to attract major foundation funding in the future.

Internal deadline: November 17

Sponsor deadlines: December 22 – Concept paper; January 15 – Proposal by invite

Internal Coordination Required: [DOC-NIST CHIPS Research and Development Office Broad Agency Announcement](#) NIST is soliciting proposals from eligible applicants for research, prototyping, and commercial solutions that advance microelectronics technology in the U.S., to be considered for funding by the CHIPS Research and Development Office (CRDO). Internal coordination is required. If you plan to submit a white paper for this BAA, you must contact Jennifer Wonder (jwonder@purdue.edu).

2. Selected Funding Opportunities:

NOTICE REGARDING NSF OPPORTUNITIES NSF has opportunities posted with pending dates but it is unclear if these programs will actual proceed or not as some previously posted opportunities have been cancelled. Please contact the appropriate NSF Program Officer for the latest status on any opportunity of interest.

Spencer Foundation Small Education Research Projects The Small Research Grants on Education Program supports education research projects that will contribute to the improvement of education, broadly conceived, with budgets up to \$50,000 for projects ranging from one to five years. This program is “field-initiated” in that proposal submissions are not in response to a specific request for a particular research topic, discipline, design, method, or location. Our goal for this program is to support rigorous, intellectually ambitious and technically sound research that is relevant to the most pressing questions and compelling opportunities in education. PIs and Co-PIs may not submit more than one research proposal to the Spencer Foundation at a time. This restriction applies to the Small Grants Program, Large Grants Program, Racial Equity Research Grants Program, and Research-Practice Partnership Program. Deadline: December 15

Spencer Foundation Research-Practice Partnerships: Collaborative Research for Educational Change The Research-Practice Partnership (RPP) Grants Program is intended to support education research projects that engage in collaborative and participatory partnerships with project budgets up to \$400,000 and durations of up to three years. This grant program is open to existing partnerships between researchers and a broad array of practitioners and policymakers. For example, practice and/or policy partners might work in school districts, county offices of education, state educational organizations, universities, community-based organizations, and other social sectors that significantly impact learners’ lives. Deadlines: November 14 – Pre-proposal; March 31 – Full proposal

Coins for Alzheimer’s Research Trust (CART) The goal of CART is to encourage exploratory and developmental AD research projects within the United States by providing support for the early and conceptual plans of those projects that may not yet be supported by extensive preliminary data, but have the potential to substantially advance biomedical research. The CART Fund invites interested applicants from within the United States only to submit a Letter-of-Intent (LOI) that includes sufficient detail to communicate the importance of your study as well as information on its feasibility. Proposals should be distinct from those projects designed to increase knowledge in a well-established area unless it is intended to extend previous discoveries toward new directions or applications. Deadlines: December 5 – LOI; February 13 – Full application by invite

Breakthrough T1D Development of Continuous C-Peptide Monitoring Technologies This RFA aims to advance the development of technologies for continuous C-peptide monitoring, primarily through early-stage and preclinical studies, with potential application across the stages of type 1 diabetes (T1D). We seek sensor platforms capable of detecting C-peptide at physiological concentrations with sufficient sensitivity, specificity, and stability for real-world, longitudinal use. While the primary focus is on continuous monitoring, proposals that enable high-frequency or at-home testing will also be considered, provided they represent clear improvements over existing methods and support practical, scalable assessment of beta cell function. Deadline: December 4 – LOI; February 12 – Full proposal

GriffinHarte Foundation The GriffinHarte Foundation is dedicated to supporting conversations, research, and teaching that help us live and work together with civility. Our mission is to provide people with the support they need to learn, teach, and explore how civility works in today’s complex world. The GriffinHarte Foundation is pleased to accept applications for grants of up to \$1,000 from individuals, agencies, or the like, who are exploring civility and the ways their efforts and research promote and contribute to our understanding of civility, civil discourses, and civil practices. Deadline: December 15
