

2025 COLLEGE OF SCIENCE RESEARCH AWARDS

DAISUKE KIHARA

PROFESSOR

Professor Daisuke Kihara, Department of Biological Sciences and Department of Computer Science, receives recognition by the College of Science awards committee for his exceptional contributions in the field of protein bioinformatics, with particular emphasis on his impactful work applying new computational methods to understand biomolecular structures using cryo-EM.

Join the College of Science as we celebrate groundbreaking research and exceptional achievements at the 2025 Research Awards. These prestigious awards recognize the contributions of our distinguished tenured faculty, including this year's honorees for their impactful work advancing scientific discovery and innovation.

The event will feature 20-minute presentations from the awardees, introduced by their department heads.

A reception will follow, offering an opportunity to engage with the awardees and celebrate their contributions to science, our college, and the broader community.

FEBRUARY 27, 2025 - 3 - 5 PM EST
EVENT LOCATION: DSAI 1069
