

TONGCANG LI

PROFESSOR

Professor Tongcang Li, Department of Physics and Astronomy, receives recognition by the College of Science awards committee for his exceptional contributions in the field of quantum information science with particular emphasis on his impactful work on spin qubits in boron nitride and for his work in levitated optomechanics.

Join the College of Science as we celebrate groundbreaking research and exceptional achievements at the 2025 Research Awards. These prestigious awards recognize the contributions of our distinguished tenured faculty, including this year's honorees for their impactful work advancing scientific discovery and innovation.

The event will feature 20-minute presentations from the awardees, introduced by their department heads.

A reception will follow, offering an opportunity to engage with the awardees and celebrate their contributions to science, our college, and the broader community.

FEBRUARY 27, 2025 - 3 - 5 PM EST
EVENT LOCATION: DSAI 1069
