

2025 COLLEGE OF SCIENCE RESEARCH AWARDS

# MICHELLE THOMPSON

ASSOCIATE PROFESSOR

Associate Professor Michelle Thompson, Department of Earth, Atmospheric, and Planetary Sciences receives recognition by the College of Science awards committee for her exceptional contributions in the field of space weathering, with particular emphasis on her impactful work on sample return missions.

Join the College of Science as we celebrate groundbreaking research and exceptional achievements at the 2025 Research Awards. These prestigious awards recognize the contributions of our distinguished tenured faculty, including this year's honorees for their impactful work advancing scientific discovery and innovation.

The event will feature 20-minute presentations from the awardees, introduced by their department heads.

A reception will follow, offering an opportunity to engage with the awardees and celebrate their contributions to science, our college, and the broader community.

**FEBRUARY 27, 2025 - 3 - 5 PM EST**  
**EVENT LOCATION: DSAI 1069**
