- If you cannot locate an individual based on their Purdue email, they may have another alias that can be found by searching on the Purdue directory.

UNDERGRADUATE STUDENTS (UG)

Before identifying undergraduates involved in this project, please become familiar with the university policy on **Authorship of Scholarly Works**. Specifically:

- Accuracy of authorship attribution is paramount to scholarly integrity and maintaining the public trust in the research and scholarship generated from Purdue University. Attribution of authorship is as critical to the integrity of the publication record as the reported methodology, interpretation or conclusions.
- Inaccurate identification of authors harms the participating scholars and the credibility of the research and the institution.
- This standard affirms the University's commitment to research and scholarship integrity as represented by listed authors and associated acknowledgment sections. This standard and its requirements are rooted in, and informed by, Purdue's overarching Statement of Integrity and Code of Conduct.
- At Purdue University, substantial contribution to a work that deserves credit as an author requires both material participation and intellectual contribution. Credit for a co-author is expected when an individual both materially participates in a research project and provides intellectual contribution for which a resulting publication would suffer if it were lacking.
- Acknowledgments may be used to denote contributions to the work that do not meet the criteria of authorship, such as supporting the study, general mentoring, acting as study coordinator or research technician, and other related auxiliary activities.

Presenters must also abide by the **Purdue Statement of Integrity and Code of Conduct**.
